EXPERIENCE TRONIUS'S NEW

ROULETTE

POWERED BY **GAMEART**

Tronius and GameArt are proud to present the most popular table game on the market – Roulette – which offers an immersive gaming experience for players.

The automated electronic Roulette powered by GameArt is a brand-new product developed by Tronius and incorporates enhanced technology, eye-catching design, and carefully selected materials.

Tronius's electronic Roulette is the perfect solution for every casino floor and meets the needs of the most demanding operators. It is designed to comply with local regulatory requirements.

Tronius's electronic Roulette combines refined materials with prestigious finishings, modern details, high-end Roulette wheel, top-notch hardware, stable software, and an attractive and intuitive user interface. Its ergonomic design offers maximum comfort for players.

The electronic Roulette machine has been developed by gaming professionals with more than 20 years of industry experience and who are well known for their technical perfection and innovation.

- » GameArt Roulette currently includes 8 playing stations, with other configuration options soon to be added.

ABOUT TRONIUS

Tronius is a leading casino gaming equipment provider based in Slovenia that creates high-quality, two- and three-screen slots, including its flagship TRON-E and ARGO ranges, along with other modern gaming machines. With more than two decades of experience in both land-based and online casino gaming, Tronius's products combine timeless quality with the latest trends and technologies, delivering an unparalleled gaming experience.

All machines feature premium quality slots developed by GameArt, one of the world's most exciting and rapidly growing game studios. They are manufactured at two state-of-the-art facilities in Slovenia and are certified by SIQ to GLI 11 standard. The gaming machines are installed in casinos across Europe, Latin America, and India, and can be experienced at major gaming trade shows across Europe and Latin America.

Tronius will soon be launching a ground-breaking new device that seamlessly connects land-based, online and mobile slots.

ABOUT GAMEART

GameArt is a developer of innovative, high-quality HTML5 slot games for online and land-based gaming operators, currently boasting a portfolio of over 100 titles. With high-resolution graphics and a rich array of in-game features, the games are designed to suit all player preferences and provide a superb gaming experience. A fast, but surprisingly affordable, custom slot development service is also offered, enabling operators to offer their players exclusive games.
